# **COMMUNITY SERVICE PLAN** & IMPLEMENTATION PLAN

Mather Hospital 2022-2024

# Mission Statement

To be recognized in New York State as the best community teaching hospital for the highest quality, compassionate and innovative care.

# Who We Are

Mather Hospital, a member of Northwell Health, is an accredited 248-bed, non-profit community teaching hospital. We provide the highest quality clinical care, educating the current and future generations of health care professionals, promoting health education and caring for the community regardless of the ability to pay.

Mather Hospital was designated as an Age-Friendly Health System by the Institute for Healthcare Improvement after participating in the first cohort of the Healthcare Association of New York State (HANYS)-led New York State Age-Friendly Health Systems Action Community. The hospital is also named an Antimicrobial Stewardship Center of Excellence by the Infectious Diseases Society of America.

Mather Hospital has earned 16 "A" ratings from The Leapfrog Group, a national nonprofit for quality and safety. The hospital has earned The Joint Commission's Gold Seal of Approval® and the American Heart/American Stroke Association's Heart-Check Mark for Advanced

Primary Stroke Care Center certification; the 2022 American Heart Association/American Stroke Association's Get with the Guidelines®-Stroke Gold Plus Quality Achievement Award; Designated twice as a Magnet®-Recognized Hospital by the American Nurses Credentialing Center, a prestigious recognition of quality, patient and staff satisfaction, and outcomes. The American Association of Critical-Care Nurses awarded a gold-level Beacon Award for Excellence to the Mather Hospital Critical Care team, which has also received the Emergency Nurses Association Lantern Award.

#### The hospital offers the following patient services:

- cancer care
- cardiology
- critical care
- nephrology
- emergency services
- orthopedics urology
- geriatric

# **About Northwell Health**

Northwell Health, New York State's largest health care provider, cares for over two million people annually in the New York metropolitan region. Northwell operates 21 hospitals across 13 campuses and 830 outpatient facilities and has more than 16,600 affiliated physicians on its medical staff, 4,200+ of which are members of Northwell's multi-specialty physicians' group. Northwell is also home to the Feinstein Institutes for Medical Research, and we train the next generation of medical professionals at the innovative Donald and Barbara Zucker School of Medicine at Hofstra/Northwell, and the Hofstra Northwell School of Nursing and Physician Assistant Studies.

Northwell has a long standing commitment to providing exceptional care and investing in our most vulnerable and underrepresented communities. We have developed an extensive network of community partnerships to impact the health and well-being of the diverse communities we serve.

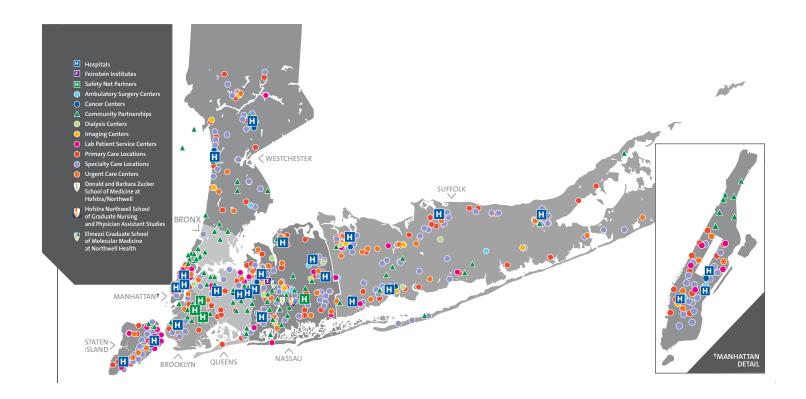

Our goal is to measurably improve health and wellness in the communities we serve and to provide the highest quality of care for all regardless of race, ethnicity, cultural background, language proficiency, literacy, age, gender, gender identity, sexual orientation, religion, disability, geographic location or socioeconomic status. Northwell's integrated community and population health strategy includes data-driven approaches to screening for and addressing non-medical factors (social determinants of health). In doing so, our mission is to empower the communities we serve to eliminate disparities and create sustainable change. This mission is aligned with the Surgeon General's National Prevention Strategy, which we believe is fundamental to raising health for all.

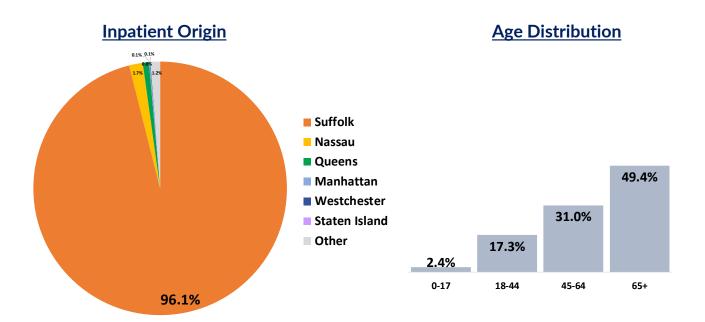

# **Our Service Area**

Northwell's service area includes the following counties: Queens, Nassau, Suffolk, Manhattan, Westchester, and Staten Island. It serves a population of 8 million residents, over fortyone percent of the total population of New York State. According to the U.S. Census, the population of the service area grew by 2.3% between 2010 and 2020; faster than the 1.5% growth of New York State overall. Nearly a fifth of the service area residents are under 18 years old, and over 16% of the population is over 65 years old. Northwell's service area contains some of the most racially, ethnic, and linguistically diverse communities in the nation which spans urban, suburban, and

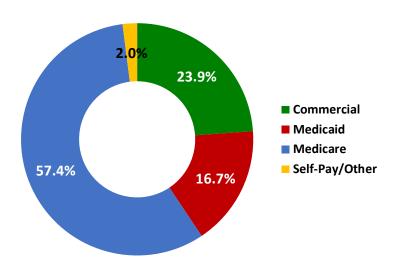

rural settings where the health of its 8 million residents are impacted by a broad range of social determinants of health. Over 4 in 10 residents are from communities of color. The service area is also characterized by a higher density of foreign-born residents (29.5%), compared to the overall state (22.4%). Economic factors such as poverty and access to care underpin the health of our residents. A tenth of the population lives below the poverty line. Over 20% of our residents receive Medicaid health insurance coverage, while over 5% of our residents remain uninsured.

# CHNA 2022 — Methodology and Significant Health Needs Identified

Our CHNA process consisted of a series of efforts to solicit input from leaders representing the interests of the communities we serve. As part of an integrated health system, the Office of Community and Population Health established the Northwell Health CHNA 2022 Steering Committee to serve as the platform of stakeholders and experts to plan, coordinate, and report the CHNA to our leadership and strategic partners. The committee agreed that the needs assessment should be based on both qualitative and quantitative data, collected from community organizations and the population at large, as well as through in-depth analyses of publicly available data on health indicators and outcomes.

Our primary analysis for our needs assessment included a series of focus group discussions (FGDs) across our health system's six-county service area. The FGDs were held with 82 leaders from governmental, non-profit, community- and faith-based organizations,

who exist to meet the needs of the underserved and marginalized populations within our communities. We also collaborated with the Greater New York Hospital Association (GNYHA) and member organizations (i.e. hospitals and health systems) to design and distribute a community health survey to garner feedback from our members themselves.

Our efforts resulted in nearly 12,000 respondents within our overall service area. The primary analysis of our assessment ensured that we include the "voice of our communities," meeting them where they are and identifying their significant and unmet health needs. We then supplemented our primary analysis with an extensive secondary analysis of publicly available community and public health data, across several data sources, to build a more robust picture of health outcomes and trends in our communities.

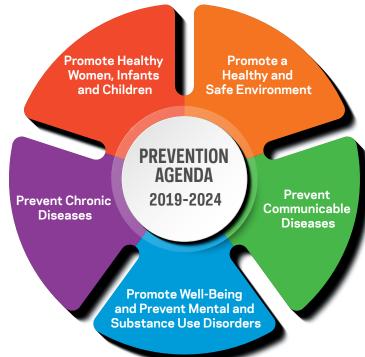

Our efforts resulted the identification of three major significant gaps in the health of our communities:

- Disruptions in care for chronic conditions
- Worsening mental health and substance use disorders
- A greater need for women and children's care

#### Prevention Agenda 2019-2024: New York State's Health Improvement Plan

Mather Hospital as part of Northwell Health, aligns its mission with the U.S. Surgeon General's National Prevention Strategy (NPS) to realize the benefits of prevention for healthier communities. The NPS provides evidence-based recommendations for improving health and wellness and addressing leading causes of disability and death. The framework of the NPS is defined by its four strategic directions and seven priorities shown below:

#### **NEW YORK STATE PREVENTION AGENDA**

Source: Adapted from National Prevention Council, National Prevention Strategy, Washington, DC: U.S. Department of Health and Human Services, Office of the Surgeon General, 2011.

#### STRATEGIC DIRECTIONS:

- Healthy and Safe Community Environments
- **Clinical and Community Preventive Services**
- **Empowered People**
- **Elimination of Health Disparities**

#### **PRIORITIES:**

- **Tobacco Free Living**
- Preventing Drug Abuse and Excessive Alcohol Use
- **Healthy Eating**
- **Active Living**
- Injury and Violence Free Living
- Reproductive and Sexual Health
- Mental and Emotional Well-Being

In alignment with the NPS, and as a result of our Community Health Needs Assessment (CHNA) process, Mather Hospital and Northwell Health have selected the following priorities and focus areas from New York State DOH's Health Improvement Plan, 2019—2024 Prevention Agenda.

The selection of our community health priorities in alignment with the NYSDOH Prevention Agenda has been reviewed and formally approved by the Committee on Community Health of the Northwell Health Board of Trustees.

Prevent Chronic Diseases	Promote Well-Being and Prevent Mental and Substance Use Disorders	Promote Healthy Women, Infants, and Children
<ul> <li>Healthy Eating and Food Security</li> <li>Physical Activity</li> <li>Tobacco Prevention</li> <li>Chronic Disease Preventive Care and Management</li> </ul>	<ul> <li>Well-Being</li> <li>Mental and Substance Use Disorders Prevention</li> </ul>	<ul> <li>Maternal &amp; Women's Health</li> <li>Perinatal and Infant Health</li> <li>Child and Adolescent Health</li> <li>Cross Cutting Healthy Women, Infants, and Children</li> </ul>

#### **Community Service Plan Highlights**

Our Community Service Plan brings together our coordinated efforts in disease prevention and promoting health and well-being for our communities. It details our evidence-based programs that are implemented in Mather Hospital and Northwell Health overall to address the significant health needs we identified, in alignment with our three selected NYSDOH Prevention Agenda items. As mentioned in other areas of our report, it

emphasizes the work we do in collaboration with our strategic partners to ensure equitable access to care and resources to prevent disease. The following section highlights some of our key initiatives that align with our selected Prevention Agenda priority areas. A more comprehensive review of our evidence-based programs, in coordination with other Northwell providers across our service area, is detailed in our Joint Implementation Plan.

# Community Service Plan: Programs and Services

### **Access to Care for the Underserved**

#### Financial Assistance Program (FAP)

In accordance with current policy at Mather Hospital and for all Northwell Health facilities and services, the ability to pay will not be a factor in the process of accepting patients. Every effort will be made to ensure that appropriate payment is made, but in no circumstance will a patient be refused medically necessary treatment due to inability to pay. In addition to our generous Financial Assistance Program (FAP) that is available to patients and their families with household incomes under 500% of the poverty line, Northwell Health has a sliding fee scale program offering services at a reduced fee. All services will be offered to those in need of care who satisfy admission requirements, regardless of age, sex, sexual orientation, race, creed, religion, disability, source of payment or any other personal characteristic.

Northwell Health is dedicated to providing accessible and affordable care to the individuals, families and communities we serve. Through our FAP, we provide discounted services — based on financial need — to those who are uninsured, underinsured, ineligible for government programs or other third-party coverage, or otherwise unable to pay for emergency or other medically necessary care. The program is designed to help patients who have received emergency or other medically necessary services but are uninsured, underinsured, or have exhausted their benefits

for a particular service. Eligibility of the program is based on current income and family size (i.e.: less than or equal to \$138,750 for a family of four).

# The program is promoted through:

- Multilingual signage throughout Northwell facilities
- Multilingual educational brochures at key points of patient contact
- Northwell's Financial
   Assistance Programs &
   Policies website
- Patient bills all bills include a notice about the FAP, along with the program's toll-free number 800-995-5727

Additionally, the application process for financial assistance is simplified; patients can apply online for the fastest turnaround time. Applications by mail and telephone are also accepted. Applications are simplified to one page and are available in 22 languages.

#### **Center for Equity of Care**

The Center for Equity of Care (CEC) focuses on redesigning Northwell's health care delivery, to provide high-quality equitable care to all our patients and the communities we serve. The CEC is focused on eliminating health disparities through a focus on diversity, equity and inclusion. The CEC's mission is to advance the delivery of culturally and linguistically appropriate health care in partnership with our communities with the goal of achieving health equity. To do this, the CEC establishes policies, procedures, and programs, in addition to training our Northwell team members. In partnership with others, some of our programs include a robust health literacy and languageaccess program, the establishment of the Hofstra/Northwell medical-legal partnership, and a system-wide social determinants of health screening and navigation program. The CEC has educated and trained our workforce on issues such as diversity and inclusion. unconscious bias, racism, social justice, health literacy, and cultural and linguistic competencies. Through these trainings, we

have created a culture change to establish a health care system that aims for belonging and social justice. Alongside our programs and training have been CEC's efforts to empower our patients and communities to be partners in their care. Collectively through these endeavors, the CEC has been Northwell's impetus in mitigating health disparities across race, ethnicity, language, sex, and gender.

# Effective Communication in Health Care

The Center for Equity of Care is a systemwide resource and offers many educational opportunities to ensure the integration of cultural and linguistic competency into the organization's fabric. To ensure meaningful access to health care services for persons with Limited English Proficiency (LEP) or persons whose preferred language is not English, free medical interpretation and document translation services are available 24/7. Sign language interpretation services for the deaf/ hard-of-hearing and specific communication tools for visually and speech-impaired patients are also available. For more information, please call the Center for Equity of Care at 516-881-7000.

#### MedShare

Northwell Health partners with MedShare, an organization that recovers valuable, unused surplus medical supplies and equipment in the United States, which would otherwise be discarded. This past year 1.67 million pounds of quality and unused medical supplies and equipment were successfully diverted from landfills. This partnership successfully bridges the gap between surplus in the U.S. and health care institutions in developing countries, which have a significant need for medical supplies and expertise. Over half of Northwell Health Hospitals and the Integrated Distribution Center provide donations, including beds, biomedical equipment and other assorted medical supplies. In 2020, Northwell Health donated more than 59,000 pounds of unused medical supplies and equipment; and in 2021, Northwell Health donated more than 120,000 pounds of unused medical supplies and equipment.

# These donations achieve multiple objectives, especially for women and children in vulnerable communities:

- Decrease global health disparities
- Increase the capacity to effectively care for more women and children in local health care systems
- Strengthen global health systems
- Improve health outcomes at the institutional and community level
- Save lives and increase the capacity to deliver quality health care

#### Military Liaison Services

# It is Time for "Thank You for Your Service" to Mean More

Each year, approximately 200,000 service members transition from active duty. An average of just 30% of these annual military end-of-service discharges qualify for some form of VA health care coverage; the remaining 70% receive coverage through Tricare for only 90 days post-discharge. As a direct response to the ongoing needs of active-duty personnel, veterans and their families, we established the

Northwell Health Military Liaison Services (NHMILS) department in 2021. Northwell Health is helping to ease the burdens for those who have sacrificed tremendously to safeguard our nation; NHMILS encapsulates administrative, social and clinical services and support for our nation's heroes under one roof. NHMILS will support Northwell in strategically standing a new service line dedicated to supporting Northwell Health's clinicians and partners in the community.

#### The NHMILS is organized into three foundational pillars:

- Exceptional Care Utilizing a proactive holistic approach to care coordination, licensed master social workers connect to service members, veterans, and their families and offer additional support post-discharge. Aspects of care routinely covered include but are not limited to patient transfers, critical care, pre-surgical testing, appointment coordination and scheduling, and conducting needs assessments,
- Life After Service Reimagining how veterans thrive when they return home from active duty, Military Talent is assisting Talent Acquisition with an additional 100 veteran, service member and spouses new hires per year by conducting one on one career planning sessions, advocating with recruiters, and hiring managers on their behalf, and
- Innovation Advancing research and discovery to treat our heroes. In close partnership with the Feinstein Institutes for Medical Research and the Center for Learning and Innovation, NHMILS works to ensure that every physician across Northwell's system is prepared to understand and care for the needs of veterans and their families.

Caring for service members and their loved ones extends far beyond behavioral health. As the largest health care provider and private employer in New York State, Northwell Health is uniquely positioned to meet these challenges head on. We provide leadership development, support for military families, advocacy for veterans, physical services and employment opportunities. Applying the Community Care Coordination Model to strengthen the private-public partnership between Northwell and the VA, we can address the social determinants of health of veterans and their families and schedule all aspects of clinical and behavioral services.

Furthermore, enveloping existing services, programs, and processes under the umbrella of the Community Care Coordination Model, NHMILS can support ongoing programs and efforts including SkillBridge (DoD "Career Skills" program) and pay differential programs. Moreover, the development of the "Side by Side" series has added value to both the veteran population and the community as a whole; this two-part event provides an opportunity to honor and celebrate our military. An evening ticketed concert, open to the public, supports our Military Liaison Services. We launched this yearly event in 2019 and over the years, we have connected with all the communities we serve in New York City and Long Island, and our efforts have been recognized by national publications and the New York Emmys for Content. The collective efforts across the organization have earned Northwell awards in 2022 including Military Friendly Top 10 Company, Military Friendly Top 10 Employer, Military Friendly Top 10 Spouse Employer, Military Friendly Supplier Diversity Program, and Military Friendly Brand.

#### **Health Solutions**

Northwell Health Solutions supports our providers who care for patients with complex medical conditions and social needs, and addresses the challenges navigating access to health care resources.

Northwell Health Solutions also oversees the organization's Health Home program.

Northwell's Health Home is a New York State Medicaid program for patients with two or more chronic medical conditions who are vulnerable to poor outcomes. A "Health Home" is not a physical place, but a group of health care and service providers working together to make sure members get the care and services they need to stay healthy. Once enrolled in Health Home, each member will have a care manager who works with them to develop a care plan. A care plan maps out the services needed, to put the members on the road to better health.

#### Some of the services include:

- Connecting to primary care providers
- Connecting to mental health and substance abuse providers
- Connecting to needed medications
- Help with housing
- Social services (such as food, benefits, and transportation)
- Other community programs that can support and assist members

# Human Trafficking Response Program

Human trafficking is a public health issue that requires cooperation and collaboration among health care, law enforcement, communitybased organizations and society as a whole. The Northwell Health Human Trafficking Task Force was created in 2018 to ensure a population approach to the crisis of human trafficking. The mission of Northwell's Human Trafficking Task Force is to provide a medical safe haven for survivors and those at risk of human trafficking at the local, national and global level and to educate, promote advocacy, respond, and train in mitigating this public health crisis. The Task Force has already become a recognized leader in rallying the health care industry to combat the social injustice of human trafficking on a local, national and international level. The Task Force has identified team leaders at Northwell hospitals to become experts on the topic, train co-workers, identify potential victims and contribute to best practices. Thanks to the Task Force, Northwell was recently honored as one of six health systems nationwide and selected

Northwell's team honored by the United Nations

to participate in a pilot study by the United Nations through Global Strategic Operatives for the Eradication of Human Trafficking (GSO). The study will aid the World Health Organization (WHO) in creating a standardized set of protocols and guidelines aimed at properly identifying human trafficking victims and helping them find safety.

#### The Human Trafficking Task Force has:

- Hosted over 8,000 attendees and participants at external educational series and symposia,
- Trained over 7,000 Northwell Health clinical and non-clinical staff members,
- Created community partnerships with the Empowerment Collaborative of LI, Clean State Living, Suffolk County, Anti-Trafficking Initiative, NOMI Networks, and RestoreNYC, and
- Prepared and distributed human trafficking education materials for the Emergency Department and Labor & Delivery service lines to display within their respective sites and locations.

# Northwell Health's Center for Transgender Care

According to the Trevor Project, transgender youth report higher rates of depression, suicidality and victimization compared to their cisgender peers. Northwell Health's Center for Transgender Care provides comprehensive, culturally competent services to address many of the health needs of trans and gender nonconforming patients in our community. The center offers primary care, immunization, HIV prevention (PrEP) and treatment, screening for sexually transmitted infections and endocrine evaluation (evaluation and

treatment with hormone replacement therapy or puberty blockers). The center also provides psychotherapy services specifically around gender transition challenges, health and sexuality education, risk reduction counseling and surgical specialty care for gender affirming surgery (i.e., transitioning). Transgender patients deserve better care and Northwell is committed to training providers to understand their unique needs to deliver gender-affirming and compassionate care.

### **Prevent Chronic Disease**

#### Food as Health

Launched in 2018, the Food as Health program is New York State's first-ever hospital-based initiative to comprehensively address food insecurity. The program's aim is to help connect the patients' health with nutrition to improve their overall wellness. Patients who screen positive for food insecurity and have a diagnosis impacted by nutrition receive personalized nutrition counseling sessions, access to nutritious foods from the onsite food pantry, referrals to community resources, and assistance with enrolling in the Supplemental Nutrition Assistance Program (SNAP). The program is administered in partnership with Long Island Cares, Inc., the Harry Chapin Food Bank, US Foods and Baldor. The goals of the program are to address the full range of factors that can lead to food insecurity, including affordability, a lack of nutritional awareness, transportation/mobility impairments and difficulty in preparing meals.

Patient consultations take place at the Food as Health Center within the hospital, or directly in the patient's room. At discharge, the patient is given a two-day supply of fresh produce and non-perishable food and a "prescription" for two refills. If patients have transportation or mobility issues, Long Island Cares will deliver emergency food supplies to their homes. In addition, dietitians assess and assist patients with resource support programs including ongoing nutrition programs as needed.

# Food as Health program highlights for 2021:

- At least 500 bags were distributed (an insulated bag with products such as milk and cheese, and a bag of fruits and vegetables per recipient).
- 11,018 meals were delivered to 62 community members through 5,509 deliveries.
- An estimated 75 people served.
- 103 clicks onto food drive link in emails sent for virtual food drive.

#### **Community Education Events**

The following events highlight Mather's efforts to raise awareness and educate its community members on chronic disease conditions.

#### **Preventive Care**

A blog educates community members on screenings for cancer, congestive heart failure management, and other chronic disease preventive care and management subjects. Typically, posts are published twice per month. A recent post was "What you need to know about lung cancer screening." https://www.matherhospital.org/our-blogs/wellness-atmather-blog/

# Diabetes, Nutrition and Mather's HealthyU Series

We work to educate community members on managing diabetes and prediabetes, including information on the Diabetes Prevention Program and how to access it. A series of webinars provided community members with education on healthy eating and physical activity. As part of Mather's HealthyU series of free community health education events, three healthy eating webinars were held in 2022. The webinars were recorded and are available for viewing online. Dietitians presented evidence-based information using three themes: nutrition for achieving fitness goals; nutrition strategies for healthy weight management during menopause; and making peace with food. Nutrition for fitness goals addressed metabolism, body composition, and nutrients and micronutrients. The weight management in menopause webinar explains the pathophysiology of menopause, explores the connection between menopause and weight gain, and discusses lifestyle changes that promote healthy outcomes using the principles of the Mediterranean diet. American Heart Association recommendations for physical activity and other evidence-based information and resources were provided. The making peace with food webinar covered the hunger scale and the ten principles of intuitive eating.

#### **Nutrition and Physical Activity**

A Weight Loss Matters Blog educates the community on healthy eating and physical activity. Articles written by dietitians or other clinicians are posted weekly on the blog, with occasional healthy recipes. Topics in 2022 have included exercise and physical activity with breast cancer, healthy lunchbox snacks, benefits of outdoor fitness, loss of control eating, exercise, and brain health. https://www.matherhospital.org/our-blogs/weight-loss-matters.e

#### Cardiac Health

Three webinars provided education on heart health: Heart care that can save your life; reduce stress and save your heart; and are you walking around with a blood clot in your leg. Presented as part of Mather's HealthyU series of free community health education events, the webinars were recorded and are available for viewing online. The stress reduction webinar included an exploration of current scientific evidence for the relationship between stress and cardiovascular disease, the impact of stress on cardiac health, actionable strategies to mitigate stress, and actionable strategies to enhance heart health. The impact of the COVID-19 pandemic on stress and stress cardiomyopathy was also discussed. In the

blood clot webinar, the content included how to recognize the signs and symptoms of deep vein thrombosis (DVT), its causes and risk factors, DVT anatomy, and treatment. This event was held as part of Mather's participation in the Go Red for Women campaign.

#### **Blood Pressure Screenings**

Community members are provided with blood pressure screenings at community events and at a local library. The screenings help to identify individuals with high blood pressure for whom follow-up is needed. This event was held as part of an organization-wide promotion of Go Red! Heart Month, in partnership with the American Heart Association.

# Screening for Colorectal and Lung Cancers

Community members were provided with education on screening for breast cancer, lung cancer and colorectal cancer. A webinar for each type of cancer screening was presented as part of Mather's HealthyU series of free community health education events. Webinars are recorded and are available for viewing online. The colorectal cancer screening webinar, presented by a gastroenterologist and associate professor at Zucker School of Medicine, provided an overview of colorectal cancer, early detection and prognosis, risk factors, symptoms, stages, colonoscopy with polypectomy, polyps, screening methods, colonoscopy prep and procedure, and U.S. Preventive Services Task Force (USPSTF) recommendations. The lung cancer screening webinar, presented by Mather's chief of pulmonary medicine, covered the condition's

impact on community, survivorship by type and stage, low-dose CT scanning, national lung screening trial, screening programs, and referral resources. The breast cancer screening webinar, presented by the medical director of Mather's breast center, covered the impact of delayed breast cancer screening, COVID vaccine myths, and the risk of COVID exposure at ACR recommended precautions. These screening events were organized through grant support from the American Cancer Society and the New York State Department of Health Community Cancer Prevention initiative.

#### **Screening for Skin Cancer**

Free skin cancer screenings are provided to community members, both onsite and in the community via a mobile unit, by a dermatologist. This program complements Mather's provision of free sunscreen to community members visiting parks, beaches, and other outdoor destinations during the summer months, for prevention and early detection of skin cancer. This event was held in partnership with the Port Jefferson Chamber of Commerce.

#### **Center for Tobacco Control**

Our Center for Tobacco Control (CTC) provides free cessation services to our community members. The program is facilitated by specialty trained nurses and nurse practitioners. Its services include individual telephonic or telehealth counseling and coaching, relapse prevention strategies, cessation medications and virtual support groups. Though the pandemic halted in-person services at the CTC, the program effectively adapted to the crisis by expanding its telehealth strategies, which have significantly expanded its outreach and footprint, from the East End of Long Island through the five boroughs of New York City, and up to Westchester County.

Additionally, in the first seven months of 2022, the CTC received 1,390 tobacco cessation referrals from physician practices, with 527 enrollments and 5,929 follow-up encounters. Over 1,000 community members were educated about their eligibility and the importance of lung cancer screening. The CTC

#### Center for Tobacco Control successes:

- 2,060 referrals received
- 802 enrollments
- 9,191 follow-up encounters (from prior enrollments)

students with education and guidance related to the evidence-based practice of treating tobacco use and dependence. The CTC also guides leaders in health care organizations to develop policies that mandate tobacco dependence treatment for all tobacco users, in both inpatient and outpatient settings. For more information about the CTC program, call 516-466-1980, or email tobaccocenter@northwell.edu.

# Promote Well-Being and Prevent Mental and Substance Use Disorders

#### Emergency Department Medication Assisted Therapy for Opioid Use Disorder

For individuals with opioid use disorder presenting in the emergency department, Mather Hospital offers buprenorphine induction and referral to outpatient medication assisted therapy (MAT), in the Chemical Dependency Clinic's Intensive Outpatient Program. Access to outpatient MAT is a critical aspect of effective treatment for opioid disorders, and it is extremely limited in the community. This intervention offers an option to individuals recovering from an opioid overdose to engage in treatment that can help them break the cycle of addiction. In 2021, there were 181 buprenorphine inductions in the hospital's emergency department. This program is in partnership with Mather's Chemical Dependency Clinic and Northwell's Emergency Medicine Service Line.

## Screening, Brief Intervention, and Referral to Treatment

The Screening, Brief Intervention, and Referral to Treatment (SBIRT) program helps identify patients in our hospitals whose drinking or substance use may be interfering with their health before it becomes a lifelong addiction. In the SBIRT program, adults who visit a participating location are pre-screened during their visit with three to five questions relating to their drinking, smoking and drug use. If they meet a certain threshold based on that pre-screening, patients are connected with a health coach for further assessment. Based on that interaction, patients may receive a brief motivational and awarenessraising intervention and, if necessary, a referral for treatment. The program promotes compassionate engagement with patients to identify potential issues. This helps reduce the stigma often associated with drug addiction and alcoholism and helps connect patients to the right treatments at the right time.

Dr. Salas-Lopez (center) pictured with faith leader participants at Faith Leaders Forum Part II: An Interfaith Dialogue on Solutions and Next Steps

## Inter-Faith Leaders' Mental Health Forum

During the pandemic, behavioral health needs soared throughout the nation. We are determined to enhance access to resources to address the mental health crisis in our communities. Our work in this space has been focused on providing education to increase awareness of mental health issues and reduce associated stigma. We have partnered with our trusted community- and faith-based leaders to develop holistic and equitable communitybased solutions to mental health needs, such as the Nassau and Suffolk Mental Health Resource List in English and Spanish. We have established models to bring mental health services into the community and explored innovative solutions to expand access, such as embedding Community Health Ambassadors in houses of worship and community-based organizations.

#### **Community Education Events**

The following events highlight Mather's efforts to raise awareness and educate its community members on mental health and substance use disorders.

#### **Behavioral Health Screening**

Mather Hospital offers free online mental health and substance abuse screening to the community and in-person screening for eating disorders. Screening participants are referred to resources. Online screening for mental health and substance abuse helps to address stigma and other barriers to care, increasing access for those needing services. Free screening for eating disorders is a vital service due to the scarcity of eating disorders programs in the community, connecting individuals to care who might not otherwise receive treatment.

# NARCAN Training and Kit Distribution to Prevent Opioid Overdoses

A community health education event was held to promote awareness of opioid disorders and the use of naloxone to reverse opioid overdose. Narcan kits are distributed to participants. Trainings were provided both in-person and via webinar. This event was held as part of a Recovery, Resiliency, and Hope series that included a collaboration with the NAACP.

### **Promote Healthy Women, Infants, and Children**

#### Katz Institute for Women's Health

The Katz Institute for Women's Health (KIWH) is a resource center dedicated to improving all aspects of a woman's health at every stage of her life. KIWH offers women seamless, coordinated access to all of Northwell Health's clinical programs and services across the continuum of care.

#### Go Red for Women

Go Red for Women is a national movement by the American Heart Association (AHA) to address heart disease and stroke in women. Cardiac conditions such as heart attacks manifest differently for women than men. Fewer women than men survive their first heart attack. Hispanic women are also likely to develop heart disease 10 years earlier than white women, and cardiovascular diseases are the leading cause of death for African American women, killing 48,000 annually. More women

are aware of this threat today — in a 2012 AHA study, 56% of women correctly identified heart disease as the leading cause of death compared to just 30% in 1997.

Northwell, through the Department of Cardiology and the KIWH, partners with the AHA to raise awareness and empower women with knowledge on the prevention, recognition and treatment of cardiovascular disease, including stroke. Northwell Health is a proud Live Fierce. Go Red sponsor in New York City, Long Island and Westchester. This year, throughout the month of February, the Go Red for Women campaign held over 25 health promotion events throughout Northwell Health's network of providers to raise awareness, promote heart health, and offer free and accessible preventive services, such as blood pressure screenings, education seminars, wellness sessions lunch and learn sessions, and exercise events.

# Restore, Nurture & Empower for Women (ReNew)

Restore, Nurture & Empower for Women (ReNew) offers alternative pain management to women as part of an integrative oncology clinic. Women are an underserved population when it comes to chronic pain. Alternative pain management strategies can help eliminate the need to prescribe opioids for pain, and thereby prevent opioid use disorder.

# Northwell's Center for Maternal Health

In Spring 2022, we launched our Center for Maternal Health to address the disproportionate rates of pregnancy-related health risks and maternal deaths among Black women. Black women in New York are three to 12 times more likely to die of childbirth-related causes than white women. The Center is a suite of programs through our sites that support high-risk women in and out of the hospital and train clinicians

on best practices. The goal is to establish a truly integrated best practice care model, going further upstream in care delivery, for our high-risk maternal patients in the community.

The initiative of the center's programs is to provide ongoing support to our highest risk mothers and newborns through individualized navigation by a team of health care professionals. The center will address the causes of disparities in maternal health by addressing outcomes for all birthing patients through its Maternal Mortality & Severe Maternal Morbidity (SMM) Review Committee. It will focus on improving maternal health within our communities by establishing a Patient and Family Advisory Council with members who have lived experience with maternal morbidity and mortality. To reach those most in need, the center will also work with community-based organizations to connect women in medically underserved communities to our maternal health services.

#### Center for Maternal Health's Goals:

- Improve Northwell's workforce knowledge of the impact of structural racism and implicit bias
- Further investigate the increased prevalence of comorbidities in Black women
- Address inherent underlying preeclampsia rate in Black women
- Address increased Cesarean delivery rate in Black women
- Explore challenges in access to care (underinsured, lack of trust, limited provider choices, language, and literacy)
- Explore every maternal death to identify factors that can be modified to prevent future tragedies

# Northwell Community Scholars **Program**

As part of our commitment to our youth, we launched the Northwell Community Scholars (NCS) program, an innovative youth education and scholarship program to create a pathway to college and future employment for adolescents of underserved and underrepresented communities in our service area. This five-year, \$5 million effort will focus on mentorship and support for students from school districts in four vulnerable neighborhoods burdened by health and social inequities: Bay Shore and Brentwood in Suffolk County, and Hempstead and Freeport in Nassau County. The program is also in partnership with Nassau and Suffolk Community Colleges.

The program addresses education, health and wellness, and social inequities prevalent in these neighborhoods that were hit hard by the pandemic. The program will support students

The goal is to expand the Community Scholars Program to 600 students by 2026

with continued growth and development, mentorship, college preparation, career advisement, and internship and shadowing opportunities. Northwell staff will also mentor students about employment opportunities within the organization, educating students on careers in clinical services, health administration, information technology, operational support and care coordination.

# Hospital Awards and Accomplishments

- Accredited Practice Transition Program, American Nurses Credentialing Center (ANCC).
- Antimicrobial Stewardship Center of Excellence, Infectious Diseases Society of America.
- Breast Imaging Center of Excellence, American College of Radiology.
- Center of Excellence in Metabolic and Bariatric Surgery, Robotic Surgery, Surgical Review Corporation.
- Comprehensive Center for Bariatric Surgery, American College of Surgeons (ACoS).
- Comprehensive Community Cancer Program, ACoS Commission on Cancer.

- Magnet Designation for Nursing Excellence, ANCC.
- National Accreditation Program for Breast Centers, ACoS.
- National Hospital Organ Donation Campaign-Platinum Recognition, Health Resources and Services Administration.
- Nursing Residency, ANCC.
- Stroke Gold Plus Recognition, Get With The Guidelines-Stroke, American Heart Association (AHA).
- Target: Stroke Honor Roll-Elite, Get With The Guidelines-Stroke, AHA.
- Target: Type 2 Diabetes Honor Roll, AHA

# **Our Leaders**

Huntington Hospital	Prevent Chronic Diseases	Focus Area 4: Preventative care and management	.1 Increase cancer screening rates	<u> </u>	Dolan Family Health Center mammograms completed by self-pay patients increased in 2021 which was hopeful following many women postponing this important health screening during the pandemic. 87% of the self-pay women who had mammograms ordered during the 2021 completed this imaging. This reflected an increase in compliance from 79% in 2020.	Pink Aid LI
Huntington Hospital	Prevent Chronic Diseases	Focus Area 4: Preventative care and management	Goal 4.3 Promote evidence-based care to prevent and manage chronic diseases including asthma, arthritis, cardiovascular disease, diabetes and prediabetes and obesity	Diabetes Tele-Enrichment Program: Dolan Family health Center's Diabetes Tele-enrichment Program began in May of 2017 by the registered dietician targeting the highest risk diabetic patients. This alternative visit program identifies ten health center patients with HgbA1c levels above 9.0% in need of coaching and support. The RD makes bi-weekly telephone appointments, scheduled phone sessions in which medication adherence, diet, needed services, barriers to self-care are covered. The goal of the program is to simplify access to the RD/Certified Diabetic Educator and expand the patients' nutritional support through the utilization of the organization's existing resources and infrastructure. Once the patient's HgbA1c is below 9.0% they graduate from the program and another patient is added.	46 patients have graduated successfully from the program and 25 patients have dropped out of the program. At the end of 2021 there were 9 individuals enrolled in the program.	American Diabetes Association

Mather Hospital	Prevent Chronic Diseases	Focus Area 4: Preventative care and management	Goal 4.3 Promote evidence-based care to prevent and manage chronic diseases including asthma, arthritis, cardiovascular disease, diabetes and prediabetes and obesity	Community Education- Nutrition: A series of webinars provided community members with education on healthy eating as well as physical activity. As part of Mather's HealthyU series of free community health education events, three healthy eating webinars were held in 2022. The webinars were recorded and are also available for viewing online. Dietitians presented evidence-based information using three themes: nutrition for achieving fitness goals, nutrition strategies for healthy weight management during menopause, and making peace with food. Nutrition for fitness goals addressed metabolism, body composition and nutrients/micronutrients. The weight management in menopause webinar explained the pathophysiology of menopause, explored the connection between menopause and weight gain, and discussed life-style changes that promote healthy outcomes using the principles of the Mediterranean diet. AHA recommendations for physical activity and other evidence-based information and resources were provided. The making peace with food webinar covered the hunger scale and the ten principles of intuitive eating.	# of webinars, # attendees, # of webinar views	1/18/22 Achieving fitness goals with proper nutrition 2/8/22 Is menopause weighing on you? Mather Hospital	Prevent Chronic Diseases	Focus Area 4: Preventative care and management	Goal 4.3 Promote evidence-based care to prevent and manage chronic diseases including asthma, arthritis, cardiovascular disease, diabetes and prediabetes and obesity	Community Education- Heart health: Community members were educated on heart health through three webinars: Heart care that can save your life, Reduce stress and save your heart, and Are you walking around with a blood clot in your leg? Presented as part of Mather's HealthyU series of free community health education events, the webinars were recorded and are also available for viewing online. Objectives for the reduce stress webinar included Explore current scientific evidence for the relationship between stress and cardiovascular disease, Explore the impact of stress on cardiac health, Discuss actionable strategies to mitigate stress, Discuss actionable strategies to enhance heart health. The COVID pandemic's impact on increased stress and stress cardiomyopathy was discussed. For the blood clot webinar, content included signs and symptoms of DVT, causes and risk factors, DVT anatomy, treatment.	attendees, program evaluations	2/1/22 Heart Care that can Save your Life: 57 attendees 2/15/22 Reduce Stress and Save your Heart: 46 attendees 6/21/22 Are you walking around with a blood clot in your leg?: 16 attendees	Clinician presenters. Some webinars held during Go Red! month
Mather Hospital	Prevent Chronic Diseases	Focus Area 4: Preventative care and management	Goal 4.1 Increase cancer screening rates	Breast Cancer Screening Navigation: Mather's Breast Cancer Screening Navigation program assists women who are overdue for a mammogram or who never had a mammogram to obtain recommended screening. A patient navigator helps women, including underserved women, to overcome barriers to screening such as language, lack of insurance, or lack of a provider. Through this assistance, breast cancer can be detected earlier when it is more treatable. The program, which collaborates with community partners to addresses disparities, has grant funding from DOH that ends in September 2022; Mather Hospital is working to continue and evolve the program to include navigation for screenings to other cancers such as colorectal and lung.	contacted,#	In 2021, the screening navigator contacted 671 women and provided navigation services for 240 women. 211 screenings were completed and there were 6 positive findings. 2022 data to be completed.	Mather Hospital partners with Elsie Owens Health Center, Nightingale Preventive Care, and the Suffolk County Cancer Services Program to engage underserved women in screening.

Mather Hospital	Prevent Chronic Diseases	Focus Area 1: Healthy eating and food security	Goal 1.3: Increase food security	Food As Health (FAH) Program: A food distribution event was held at Comsewogue High School in Port Jefferson Station. Recipients were provided with bags of dairy products, fresh fruits and vegetables, a healthy meal kit, and information on local food pantries and soup kitchens. A collaboration with Northwell's Community and Population Health, Mather Hospital provided staff and supplies for the event, which provided families in an underserved area with nutritious food items that are more difficult for those impacted by food insecurity to obtain. One off event	distributed	At least 500 bags were distributed (one insulated bag with cold products such as milk and cheese, and one bag of fruits and vegetables per recipient).	Suffolk County Women's Alliance to End Food Insecurity partnered in holding the event. Internal Northwell's Community and Population Health and Mather team
Mather Hospital	Prevent Chronic Diseases	Focus Area 1: Healthy eating and food security	Goal 1.3: Increase food security	Food As Health (FAH) Program: Mather Hospital provides discounted meals to Meals on Wheels, which delivers to homebound, handicapped, chronically ill, or convalescent persons in our community who are unable to prepare their own food. Mather Hospital's dietary department collaborates with Meals on Wheels each year to ensure homebound individuals receive two nutritious meals/day. Ongoing activity that happens throughout the year. One off event		In 2021, 11,018 meals were delivered to 62 community members through 5,509 deliveries. 2022 data not yet available.	This is a partnership with Three Village Meals on Wheels.

South Shore University Hospital	Prevent Chronic Diseases	Focus Area 4: Preventative care and management	Goal 4.2 Increase early detection of cardiovascular disease, diabetes, prediabetes and obesity	The Diabetes Club: provides current information and support to the community members living with Diabetes. Topics vary according to participants needs.	Number of participants enrolled	2021: Program was put on hold due to COVID. 2022: Number of participants enrolled; 7	SSUH Pharmacy provides educational lectures on antidiabetic medication.
South Shore University Hospital	Prevent Chronic Diseases	Focus Area 4: Preventative care and management	Goal 4.3 Promote evidence-based care to prevent and manage chronic diseases including asthma, arthritis, cardiovascular disease, diabetes and prediabetes and obesity	Stop the Bleed: an initiative of the American College of Surgeons, was launched in October 2015 by the White House. It's a national awareness campaign and a call to action intended to educate, train and empower civilian bystanders with the necessary skills and tools to help in a bleeding emergency before professional help arrives. When a response is delayed, massive bleeding from any cause can result in death. Similar to how the general public learns and performs CPR, the public must learn proper bleeding control techniques, including how to use their hands, dressings and tourniquets	Number of participants enrolled	2021-90 participants 2022- 100 participants	American College of Surgeons
South Shore University Hospital	Prevent Chronic Diseases	Focus Area 4: Preventative care and management	Goal 4.3 Promote evidence-based care to prevent and manage chronic diseases including asthma, arthritis, cardiovascular disease, diabetes and prediabetes and obesity	Stepping On: More than one out of four adults aged 65 or older falls each year, leading to both fatal and non-fatal injuries, and threatening safety and independence. Stepping On is an evidence-based community prevention program that empowers independent, older adults to carry out health behaviors that reduce the risks of falls. In a small group setting, older adults learn balance and strength exercises and develop specific knowledge and skills to prevent falls. Workshops are facilitated by trained leaders.	TBD	Postponed due to COVID - goal to restart in late 2022	Internal partners

South Shore University Hospital	Prevent Chronic Diseases	Focus Area 2: Physical activity	ple of all agr door places	exercise program that is proven to reduce pain and improve overall health.  If you can be on your feet for 10 minutes without increased pain, you can have success with Walk with Ease.  Benefits:Motivate yourself to get in great shapeWalk safely and comfortablyImprove your flexibility, strength and stamina	Number of participants enrolled	Numbers are low due to COVID  18 Sessions- 10 participants	Arthritis Foundation

Huntington Hospital	Promote Healthy Women, Infants and Children	Focus Area 2: Perinatal & Infant Health	Goal 2.2: Increase breastfeeding	Breastfeeding Friendly Hospital Initiative: The Dolan Family Health Center has been a NYSDOH Breastfeeding Friendly Practice since 2016. This includes: maintaining a breastfeeding-friendly office policy, training all staff to promote, support and protect breastfeeding, discontinuing the distribution of infant formula samples, creating a breastfeeding friendly environment, discussing breastfeeding benefits and management during the prenatal and postpartum periods, encouraging exclusive breastfeeding and providing support, assistance and education to breastfeeding mothers. An RN who provides nursing care in our OB/GYN department is an International Board Certified Lactation Consultant (IBCLC) and a Certified Pediatric NP who provides primary care in our Pediatric department is a Certified Lactation Counselor (CLC). The health center's ability to provide expert breastfeeding guidance and counseling to our patients is a tremendous asset in our continued effort to encourage our patients to exclusively breastfeed, emphasizing the benefits of the first and best nutrition available to babies. Prenatal patients were offered private breastfeeding educational/support sessions with our lactation specialists. Virtual breastfeeding visits via telephone and telehealth have been initiated and offered to our patients in light of COVID-19 practice	patients	2021: All 276 enrolled prenatal patients received breastfeeding education as part of their prenatal care. 71 individualized breastfeeding educational sessions were held and documented in 2021. Providing individualized care is the priority for these women and their babies.	WIC (Suffolk county Dept of Health) program is onsite at Dolan and supports breastfeeding as well.
Huntington Hospital	Promote Healthy Women, Infants and Children	Focus Area 3: Child & Adolescent Health	Goal 3.1: Support and enhance children and adolescents' social-emotional development and relationships	Reach Out and Read: The Dolan Family Health Center participates in the Reach-Out-and-Read Program since 2000. This program links literacy with early pediatric visits. Pediatric health care providers provide parents/guardians with information about the importance of reading to their children and age/culturally appropriate books are given to children at well check-ups from six months to five years of age. In 2021, books were given to children of this age group at their 1,847 Complete Physical Exams. South Shore University Hospital	Promote Healthy Women, Infants and Children	Focus Area 3: Child & Adolescent Health	and enhance children a emotional developmen ationships	Born to Read: Each year, SSUH partners with the national Born to Read Program, a family literacy promotion program offered to every newborn delivered at the hospital. Designed to empower parents to be their child's first teacher, handmade cloth bags are presented to the family, containing a book to be read to the child, a list of local libraries, a list of recommended reading to toddlers and preschoolers, and an application for English literacy. The program is available in both Spanish and English.	Number of newborns delivered at hospital	To date: 500 newborns	National Born to Read program
South Shore University Hospital	Promote Healthy Women, Infants and Children	Focus Area 3: Child & Adolescent Health	3.1: Support and enhance children and cents' social-emotional development and relationships	My Brother's Keeper (MBK) Program: Brentwood Union Free School District, (BUFSD), the goal of increasing academic and social outcomes through mentoring, leadership development, college awareness and minimizing the gaps for young men of color. The MBK Community Challenge asks for communities to work with community leaders, educators, business leaders and youth development experts across sectors to design and implement action plans that expand opportunities for All young people; regardless of who they are, where they come from, or the circumstances into which they are born. 2020 & 2021- SSUH donated \$4000 to purchase 8 laptops for 8 young men.	Number of participants enrolled	2020 & 2021- SSUH donated \$4000 to purchase 8 laptops for 8 young men	My Brother's Keeper Brentwood High School
