## Northwell Community Relations Dept., Local

### Focus Area 2: Physical

#### Prevent Chronic Diseases

- **Goal 2.1**: Prevent initiation of tobacco use among youth and young adults. Northwell Health has a tobacco cessation program that is compliant with the federal health care prevention of tobacco use and smoking cessation guidelines. The Tobacco Cessation Program offers tobacco users support,依附件标准（附件）辅导方案和标准，通过电子化记录。在内部，应将记录安全的实体和电子文件。健康促进团队与Baitul Jaamat House of Community合作，与该社区的健康促进团队合作，通过各种社区活动、社区医生和社区项目，进行宣传和教育，以提高公众对某些健康问题的认识。

- **Goal 2.2**: Promote tobacco use dependence as well as the issues of vaping and method. The goal of our program is to decrease tobacco use among community members and employees of the health system.

- **Goal 2.3**: Increase access, for transportation and recreational environments that support active activity for people of all ages and abilities. Glen Cove Hospital has also developed a community outreach process for our Caregiver Center that provides resources and contacts for anyone in need of advisement.

- **Goal 2.4**: Increase community health teams to improve family health by improving health outcomes and increasing access to health care services. This workshop will provide participants with the basics of proper car seat selection, installation and use. Car seat check events were held at the Glen Cove Public Library and the Glen Cove Hospital parking lot.

---

### Focus Area 3: Preventative care and activity

- **Goal 4.1**: Increase cancer diagnosis. Lung Cancer Screening Program: The program is designed to detect lung cancer at an early stage and improve outcomes. The Cancer Services Program (CSP) provides no-cost screening for Breast, Colon, and Cervical Cancer for uninsured or underinsured New York State residents. The program covers screenings and diagnostics up to the time of a proven cancer diagnosis funded by the New York State Department of Health.

- **Goal 4.2**: Increase access to health care services. Northwell Health Solutions for also making a substantial impact in the community. The program began to foster new community relationships and build a network of contractors.

- **Goal 4.3**: Increase access to health care services. This program has just been approved by Nassau County and the City of Glen Cove to continue for the next two years. As part of the ongoing partnership, we will be providing a safe and healthy environment for our Caregiver Center participants.

---

Social Work Services:

Across the ambulatory sites.

Through a proactive approach to care coordination, licensed social workers connect to service members, Veterans, and their families and offer additional support to our communities, to see them fully and to break down the barriers that keep them from exceptional care. We know that our commitment will continue to be important to the lives of service members and their families.

Cohen Children’s Medical Center is proud to host a business station within Commerce Plaza, “employing” a Doctor, Nurse, Office Manager, X-Ray Technician, and Medical Biller. Students who rotate through this station learn more than just business and finance skills, but are introduced to the principles of sustainable design, health care, and technology.

Community Education- Nutrition and Physical Activity:

Promoting healthy eating and physical activity, the Mediterranean diet. AHA recommendations for physical activity and other evidence-based information and resources were provided.

The goal is that participants will be able to identify risk factors for obesity and other chronic diseases, discuss strategies to prevent and manage weight-related problems, and implement goals specific to their needs.

Another step towards preventing chronic diseases is to increase early detection and management.

By the end of 2021, there was a total of 2,500 students reached.

3,225 successful graduations out of the Health Home program: 3,225

• Help with housing,
• Employment services;
• Other community programs that can support and assist members. In addition, CMPAs are also engaged in activities specific to relieving the Socioeconomic Determinants of Health (SDoH) and health disparities.

A Health Home is a Medicaid program for patients with 2 or more chronic medical conditions susceptible to poor outcomes.

Our commitment to improving the health and well-being of our service members, Veterans, and their families is deep and enduring. We continually strive to improve the quality of care and services we provide.

A Health Home is a Medicaid program for patients with 2 or more chronic medical conditions susceptible to poor outcomes.

We know that our commitment will continue to be important to the lives of service members and their families.

While the focus of the Health Home program is on health care, it also addresses the broader issues of health and well-being, including social determinants of health.

Any individual with two or more chronic medical conditions can enroll in a Health Home, regardless of whether those conditions are related to each other.

After enrollment, the Health Home care manager will work with the member to develop a care plan that addresses all of their health needs and goals.

Focus Area 4:

This was a health fair, we interacted with a total of 560 people during the event. hempstead police department, fidelis health northwell community relations dept. local lij valley stream, cancer, community and health. 350 total of people attended the fair, out of those 350 people, 49 people were BP screened. We had about 10 sessions and 15 community persons for each session. A total of 150 students attended the event. lij valley stream nursing staff. Total screenings performed 21 (out of 21 screenings 19 did glucose; 21 did height and weight; 21 did waist circumference; 21 did blood pressure). 150 total people attended the festival, out of those 150 people served, 35 were screened, the other 115 visited the other informational tables. Preventive care and management skills for individuals with chronic diseases, including asthma, arthritis, cardiovascular disease, diabetes and prediabetes and obesity. Goal 4.4 In the community care to prevent and manage chronic diseases including asthma, arthritis, cardiovascular disease, diabetes and prediabetes and obesity. Goal 4.3 Promote evidence-based preventive care to prevent and manage chronic diseases, including asthma, arthritis, cardiovascular disease, diabetes and prediabetes and obesity. And historically lower access to healthcare. We target the communities with the highest rates of the disease, diabetes and prediabetes and obesity.

Pharmaceutical companies that back our local libraries: drug stores.

Sound asleep. The Community Health Fair enjoying the day.

Health Fair for the Backstretch workers at Belmont Race track includes glucose screening, BP screening, BMI screening along with education provided by an Advanced Care Practitioner. This program can be both virtual and in-person. Attendance is 10-15.

Nutrition: Food and shelter. We encourage organizations to uphold their missions within schools and within the community here to provide them with the tools to be health-promoting places.

Number of attendees 25 people were educated on Food-Bert Heart.

Preventive care and management skills for individuals with chronic diseases, including asthma, arthritis, cardiovascular disease, diabetes and prediabetes and obesity.

In 2021, we provided 800 free flu shots. For 2022, we are on target to do the same (as of 10/12 we have over 615 shots given). We work with community organizations to speak to their members about when to call an ambulance and how to prepare in case of an emergency.

Number of vaccines 800 people were vaccinated.

University Health System and Public Health Care. Bridging the gap in the community. One-off event.

Number of participants 50 people were vaccinated.

We target the communities with the highest rates of the disease, diabetes and prediabetes and obesity.

We reached out to new audiences and continued with our traditional communities.

Number of attendees 210 people attended the event.

8:30 a.m. - 10:00 a.m. We aimed to reach a total of 35 people during the event.

We believe our program has the potential to help many people in the community.

Number of participants 30 people attended the event.

2:00 p.m. - 4:00 p.m. We believed that a total of 35 people were interested.

The mission of the community health fair is to provide information and education on various health topics for the attendees at the event.

Number of attendees 20 people attended the event.

9:00 a.m. - 11:00 a.m. We set out to reach a total of 35 people.

The program included discussions on various health-related topics and provided educational materials.

Number of attendees 80 people attended the event.

3:00 p.m. - 5:00 p.m. We aimed to educate a total of 35 people.

This program was designed to provide information on various health topics to the attendees at the event.

Number of participants 150 people attended the event.

Focus Area 1: Preventative care and environments that promote well-being for all ages

Goal 1.1: Strengthen respect and dignity for people of all ages
- Our center recognizes and respects the different cultures, ethnicities, religions, and personal beliefs of all who seek care.
- We ensure that all care is provided in a manner that respects the individual's cultural background and personal values.
- We provide culturally competent care to ensure that all patients feel valued and respected.
- We actively seek feedback from patients to ensure that our care is culturally sensitive.
- We promote diversity and inclusion in our workforce and leadership.

Goal 1.2: Facilitate supportive environments that promote well-being and resilience across the lifespan
- We provide a safe and supportive environment that promotes well-being and resilience for all ages.
- We strive to create a welcoming and inclusive space for all patients.
- We ensure that our facilities are accessible to all patients, regardless of their physical abilities.
- We provide resources and support to help patients maintain their well-being and resilience.

Focus Area 2: Promote well-being and prevention of chronic diseases

Goal 2.1: Enhance access to preventive services and opportunities for well-being
- We provide access to comprehensive preventive services that promote well-being.
- We offer educational programs and resources to help patients maintain their health.
- We prioritize the prevention of chronic diseases through early detection and intervention.
- We work with patients to develop strategies for maintaining their well-being.

Goal 2.2: Support patients in managing chronic conditions
- We provide ongoing support for patients with chronic conditions.
- We offer resources and tools to help patients manage their conditions.
- We work with patients to develop personalized treatment plans.
- We prioritize the prevention and management of chronic diseases through early detection and intervention.

Focus Area 3: Prevent mental and substance use disorders

Goal 3.1: Screen for and treat mental health conditions
- We prioritize the early detection and treatment of mental health conditions.
- We offer screening and treatment services for mental health conditions.
- We work with patients to develop personalized treatment plans.
- We prioritize the prevention and management of mental health conditions through early detection and intervention.

Focus Area 4: Prevent chronic diseases

Goal 4.1: Enhance access to preventive services and opportunities for well-being
- We provide access to comprehensive preventive services that promote well-being.
- We offer educational programs and resources to help patients maintain their health.
- We prioritize the prevention of chronic diseases through early detection and intervention.
- We work with patients to develop strategies for maintaining their well-being.

Goal 4.2: Support patients in managing chronic conditions
- We provide ongoing support for patients with chronic conditions.
- We offer resources and tools to help patients manage their conditions.
- We work with patients to develop personalized treatment plans.
- We prioritize the prevention and management of chronic diseases through early detection and intervention.

Focus Area 5: Prevent and manage mental and behavioral health needs

Goal 5.1: Enhance access to mental health services and support
- We provide access to comprehensive mental health services and support.
- We offer educational programs and resources to help patients maintain their mental health.
- We prioritize the prevention and management of mental health conditions through early detection and intervention.
- We work with patients to develop strategies for maintaining their mental well-being.

Goal 5.2: Support patients in managing mental health conditions
- We provide ongoing support for patients with mental health conditions.
- We offer resources and tools to help patients manage their conditions.
- We work with patients to develop personalized treatment plans.
- We prioritize the prevention and management of mental health conditions through early detection and intervention.

Focus Area 6: Prevent and manage chronic pain

Goal 6.1: Enhance access to effective pain management services
- We provide access to comprehensive pain management services.
- We offer educational programs and resources to help patients manage their pain.
- We prioritize the prevention and management of chronic pain through early detection and intervention.
- We work with patients to develop strategies for managing their pain.

Goal 6.2: Support patients in managing chronic pain
- We provide ongoing support for patients with chronic pain.
- We offer resources and tools to help patients manage their pain.
- We work with patients to develop personalized treatment plans.
- We prioritize the prevention and management of chronic pain through early detection and intervention.

Focus Area 7: Prevent and manage sleep disorders

Goal 7.1: Enhance access to effective sleep management services
- We provide access to comprehensive sleep management services.
- We offer educational programs and resources to help patients manage their sleep.
- We prioritize the prevention and management of sleep disorders through early detection and intervention.
- We work with patients to develop strategies for managing their sleep.

Goal 7.2: Support patients in managing sleep disorders
- We provide ongoing support for patients with sleep disorders.
- We offer resources and tools to help patients manage their sleep.
- We work with patients to develop personalized treatment plans.
- We prioritize the prevention and management of sleep disorders through early detection and intervention.

Focus Area 8: Prevent and manage addiction

Goal 8.1: Enhance access to effective addiction management services
- We provide access to comprehensive addiction management services.
- We offer educational programs and resources to help patients manage their addiction.
- We prioritize the prevention and management of addiction through early detection and intervention.
- We work with patients to develop strategies for managing their addiction.

Goal 8.2: Support patients in managing addiction
- We provide ongoing support for patients with addiction.
- We offer resources and tools to help patients manage their addiction.
- We work with patients to develop personalized treatment plans.
- We prioritize the prevention and management of addiction through early detection and intervention.

Focus Area 9: Prevent and manage mental and behavioral health needs

Goal 9.1: Enhance access to mental health services and support
- We provide access to comprehensive mental health services and support.
- We offer educational programs and resources to help patients maintain their mental health.
- We prioritize the prevention and management of mental health conditions through early detection and intervention.
- We work with patients to develop strategies for maintaining their mental well-being.

Goal 9.2: Support patients in managing mental health conditions
- We provide ongoing support for patients with mental health conditions.
- We offer resources and tools to help patients manage their conditions.
- We work with patients to develop personalized treatment plans.
- We prioritize the prevention and management of mental health conditions through early detection and intervention.

Focus Area 10: Prevent and manage chronic pain

Goal 10.1: Enhance access to effective pain management services
- We provide access to comprehensive pain management services.
- We offer educational programs and resources to help patients manage their pain.
- We prioritize the prevention and management of chronic pain through early detection and intervention.
- We work with patients to develop strategies for managing their pain.

Goal 10.2: Support patients in managing chronic pain
- We provide ongoing support for patients with chronic pain.
- We offer resources and tools to help patients manage their pain.
- We work with patients to develop personalized treatment plans.
- We prioritize the prevention and management of chronic pain through early detection and intervention.

Focus Area 11: Prevent and manage sleep disorders

Goal 11.1: Enhance access to effective sleep management services
- We provide access to comprehensive sleep management services.
- We offer educational programs and resources to help patients manage their sleep.
- We prioritize the prevention and management of sleep disorders through early detection and intervention.
- We work with patients to develop strategies for managing their sleep.

Goal 11.2: Support patients in managing sleep disorders
- We provide ongoing support for patients with sleep disorders.
- We offer resources and tools to help patients manage their sleep.
- We work with patients to develop personalized treatment plans.
- We prioritize the prevention and management of sleep disorders through early detection and intervention.

Focus Area 12: Prevent and manage addiction

Goal 12.1: Enhance access to effective addiction management services
- We provide access to comprehensive addiction management services.
- We offer educational programs and resources to help patients manage their addiction.
- We prioritize the prevention and management of addiction through early detection and intervention.
- We work with patients to develop strategies for managing their addiction.

Goal 12.2: Support patients in managing addiction
- We provide ongoing support for patients with addiction.
- We offer resources and tools to help patients manage their addiction.
- We work with patients to develop personalized treatment plans.
- We prioritize the prevention and management of addiction through early detection and intervention.

A webinar providing the community with education on opioid use disorder was held. Presented as part of International Overdose Awareness Day, the event focused on reducing the stigma associated with substance use disorders and promoting awareness of naloxone, a medication used to reverse opioid overdose deaths. The webinar covered topics such as the science behind opioid use disorder, the impact of overdose on families, and how to access naloxone. A Q&A session was held following the presentation to address any additional questions or concerns from participants.

The June trainings were part of a Recovery, Resilience, and Redirection Event, a series of workshops and support groups for individuals and families affected by addiction. The workshops focused on various topics, including mental health, family support, and community resources. In addition, a community-wide event was held on International Overdose Awareness Day to raise awareness and provide resources for those affected by opioid use disorder.

Looking to the future, the Community Education Program plans to continue partnering with community organizations and agencies to provide education on opioid use disorder. The program aims to reach a diverse range of individuals, including those in high-risk communities, to increase awareness and reduce stigma associated with substance use disorders.

For more information about the Community Education Program or to get involved, please visit our website or contact us directly. Together, we can make a difference in the fight against opioid use disorder and support those affected by this epidemic.
Breastfeeding Friendly Hospital Initiative:
Northwell Community Relations Dept., Local 2021: All 276 enrolled prenatal patients received breastfeeding education as part of their prenatal care.

Partnership with Mastic Moriches Shirley Reach-Out-and-Read
